SHOPPING CART ELITE
SUCCESS STORY WITH V2 CLOUD

Shopping Cart Elite is for companies who are dissatisfied with the limitation of their shopping cart. It is an ecommerce solution that completely automates your online business. Unlike the majority of shopping carts on the market, they have created a software that doesn't require you to have a bunch of third party apps in order to have automation, marketing and SEO tools for your online business.

We were looking for a solution to bring our cloud-based windows software client into a virtualized environment to create a beautiful and most importantly functional HTML5 experience.

We demoed different solutions but all of them lacked both the user experience that we demanded and the commitment from the leadership to support it after it was enhanced.

Matt, CEO of V2 Cloud and his team worked with us until we were satisfied with the user experience. They also continued innovating the solution beyond our imagination.

We believe that **V2 Cloud** is the only solution on the market that is capable of creating a true web based experience for a windows application.

Igor Shoshkin

CEO, Shopping Cart Elite

V2 Cloud client since February 2015

V2 CLOUD

V2 Cloud WorkSpaces is a fully managed desktop as a service offering that enables you to securely access data, business applications, documents and other resources from anywhere on any device.

For Small & Medium-Sized Businesses, we securely host your cloud-based desktops so they are always optimal and accessible. Everything is automatically backed-up every day and you have full admin control. V2 Cloud WorkSpaces features a multi-user windows operating system with Microsoft Office and all your business applications that you, your employees and consultants can access from any computer, phone or tablet anywhere around the globe.

Don't want to host your data on V2 Cloud? No Problem! Simply license our **remote access software** and have your data on any other Cloud provider such as Microsoft Azure, Amazon AWS or Google Cloud Platform.

For **Software Vendors,** we host your desktop applications on V2 Cloud and stream it directly to your users' web browser. You can have a Cloud version of your software without having to write any code. This makes it easy for you to leverage subscription-based model instead of perpetual licenses.
